Hushabye
Nursery®

IMPACT REPORT

JANUARY 2022 - DECEMBER 2022

We offer compassionate, evidence-based care that changes lives.

Opioid Use Disorder (OUD) during pregnancy has been linked to serious negative health outcomes for pregnant women and developing babies including preterm birth, stillbirth, maternal mortality, and Neonatal Abstinence Syndrome (NAS).

Hushabye Nursery is working to improve systems to help ensure that every newborn experiencing NAS, and their family experiencing OUD, receive the right care at the right price for better overall health outcomes.

Reduced Length of Stay

Average NICU stay is

22 DAYS

in Current Standard of Care

Average Hushabye Nursery stay is

8 DAYS

Our innovative care model for treatment of NAS infants significantly decreases length of stay.

Dramatic Decrease in Cost

Average NICU cost is

\$44,824

Average Hushabye Nursery cost is

\$9,824

The financial savings to the healthcare industry could be substantial as a majority of newborns with NAS are insured by Medicaid.

COMMUNITY REFERRALS

Hushabye Nursery helps families navigate the healthcare maze as well as other critical systems and social services. We made

1,758

referrals to community partners.

Infants Breastfeeding **23%**

Decreased Usage of Morphine

Hushabye Nursery's integrated, family-centered care model provides the ideal setting for implementation of the Eat, Sleep, Console method that minimizes the need for pharmacologic support.

98%

of NICU babies are treated with Morphine compared to

34%

at Hushabye Nursery

42%

of NICU babies who arrived at Hushabye had already been administered Morphine; Only

67%

needed continued treatment during their Hushabye stay.

8%

received their first dose of Morphine at Hushabye Nursery.

We Served

588

PARENTS

(Outpatient) and

239

INFANTS

(Inpatient)

90 DAY FOLLOW UP

83%

Decrease in substance abuse.

69%

Increase in patient safety.

68%

Increase in parenting knowledge.

CLIENT SATISFACTION

99%

Would recommend the program to someone they cared about.

99%

Felt safe.

Since Opening November 2022

1,048 PARENTS | 427 INFANTS

High Success Rate in Working With Mothers Prenatally

79%

of mothers who are prenatally involved with Hushabye Nursery safely maintained custody of their infant.

46%

of mothers who are not prenatally involved with Hushabye Nursery experienced placement of their infants in foster/kinship care.

Our comprehensive approach addresses the needs of the entire family, from prevention for the child to recovery for the adult.
